

CAST IRON RADIATOR JOINING SERVICE

To enhance the service AEL already provide to our customers we can now offer a Cast Iron radiator joining service for any Cast Iron radiator supplied in a primer finish only.

AEL will join up to 30 sections of Victoriana, Royal, Viscount, Art Deco or Bohemian Cast Iron Radiators into one radiator ready for your engineers on site only having to put it into position and fit the four corner bushes plus the wall retaining stays.

It is very important that whoever is ordering the pre joined Cast Iron radiators takes into account the weight and dimensions of the radiator/s because it is their responsibility to be sure that the vehicle can be safely offloaded from the nearest hard standing position once it arrives at site.

NUMBER OF SECTIONS TO BE JOINED

PRICE TO SUPPLY PRE JOINED

11 to 30 SECTIONS (Per radiator).....£55.00 EX VAT

TRANSPORT COST

The standard carriage charge of **£55 ex vat** will still apply to pre joined radiators up to 20 sections in length but AEL must charge **£110 ex vat** carriage for any oversized pallets that are transporting pre built radiators over 21 sections in length. Each standard or oversized pallet can carry up to a total of 80 sections of Cast Iron radiators.

OFFLOADING

Should the pallet/s arrive on site and not be able to be offloaded by the customer for whatever reason then we will re deliver but all the carriage costs will need to be charged again.
