AEL RADIATOR VALVE COLLECTION

NOTE: Please cross check the valve reference number below against the style and finish of valves in the AEL Radiator Valve brochure page shown below:

Brochure Page	Valve connection and REF No		Price per valve set (Ex VAT)
PAGE 1	*15mm & ½" Conns*	TA8	**55.00** (CHROME £35.00)
	22mm or ¾" Screwed Conns		**67.00**
PAGE 1	*15mm Conns*	TS9	**55.00** (CHROME £35.00)
	22mm or ¾" Screwed Conns		**67.00**
PAGE 2	*15mm Conns*	TA17	**93.00**
	22mm Conns		**98.00**
PAGE 2	*15mm & ½" Conns*	TA18	**93.00**
PAGE 3	*15mm Conns*	TRE19	**95.00**
PAGE 3	*15mm Conns*	TRE20	**95.00**
PAGE 3	*15mm Conns*	TRE21	**75.00**
PAGE 3	*15mm Conns*	MRE22	**65.00**
PAGE 4	*15mm Conns*	MA10	**36.00**
	22mm or ¾" Screwed Conns		**48.00**
PAGE 4	*15mm Conns*	MS11	**36.00**
PAGE 4	*15mm & ½" Conns*	MA12	**36.00**
	22mm or ¾" Screwed Conns		**79.00**
PAGE 4	*15mm Conns*	MA13	**36.00**
	22mm or ¾" Screwed Conns		**48.00**
PAGE 4	*15mm Conns*	MA14	**36.00**
PAGE 4	*15mm Conns*	MA15	**36.00**
PAGE 4	*15mm / 1/2"*	MA16	**98.00**
	22mm or ¾" Screwed Conns		**142.00**
PAGE 5	*½" & ¾" Screwed Conns*	TAS17	**95.00**
PAGE 5	*15mm Conns*	TA8	**55.00** (WHITE)
PAGE 5	*15mm Conns*	TA23	**89.00**
PAGE 5	*15mm Conns*	TS24	**85.00**
PAGE 5	*(2 PIPES & 2 SHROUDS)*	EPK 250	**15.00 per set**

Carriage is charged @ **£12.50 EX VAT** for every ten sets of valves sent out together (Mainland UK only).

Correct Pipe Connection Size Reference

It is a common mistake to mix up the pipe size references for copper and steel pipe.
For clarification, please note that the correct pipe diameter reference for Copper pipe is metric 15mm and 22mm and the correct pipe diameter reference for steel pipework is imperial ½" and 3/4".

NOTE: Please check before placing your order that you have chosen the correct valve set and that the valves you have chosen are suitable for the pipework , radiator and system design pressure you are working to, for technical assistance please contact **sales@aelheating.com** .

Installing AEL Thermostatic Radiator Valves Saves Money

By installing and correctly using a room thermostat with AEL thermostatic radiator valves you could save between £70 and £150 per year as well as between 310kg and 630kg carbon dioxide.

You can also make savings by using your controls more effectively, by turning your room thermostat down by one degree you can save around £75 per year and 310kg carbon dioxide.

It is worth remembering that you can upgrade or install new heating controls and AEL radiator valves without replacing your boiler and it's a particularly good idea to think about this if your controls are over 12 years old.

Room thermostats, for example, are much more accurate than they used to be.
